

PLEASE...let the free market sort this out. If the broadcasters need to upgrade their procedures for delivering traffic and weather to be competitive then let them adjust to the market place. The continuous traffic and weather (no we don't have it where I live) is a great benefit to motorists around the country. They don't have to wait 15 to 30 minutes for the next weather and traffic report. Please reject petition 04-160. One further thing, I am a former broadcaster of over 40 years.
